

Automatic walnut production line processing equipment quotation

serial number	Equipment Name	Specification(mm)	quantities	Unit price (USD)	Total price (USD)	note	Equipment Photos
---------------	----------------	-------------------	------------	------------------	-------------------	------	------------------

A: Walnut de-greening drying production line processing equipment

1	Scraper Elevator	4000x400	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
2	Overhead Conveyor	4500x400	1	\$3,600	\$3,600	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.55KW. 3.White food grade belt.	
3	Guide Scraper Conveyor	700x400	1	\$2,000	\$2,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.37KW. 3. White nylon mesh plate, scraper height 50mm.	
4	Stainless steel silo	2400x2400	2	\$6,400	\$12,800	Both sides are equipped with vibrators to achieve uniform discharge without clogging, with photoelectric control: the bin is full automatically close the feed, the bin is empty automatically open the feed. Capacity: about 2 tons	
5	Scraper Elevator	2000x600	2	\$2,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.55KW. 3. White nylon mesh plate, scraper height 50mm.	
6	Walnut De-Blackening Machine	2200x1200	2	\$9,400	\$18,800	This machine shell stainless steel, the use of free rotary cutting peeling, walnuts into the rotary cutting hob area, high-speed hob began to cut the green skin, walnuts at the same time free to roll so that all sides of the hob cutting, clean walnut diameter is not easy to be chipped, constantly rolled out of the rotary cutting area, the lower part of the receiving tray, conveying green skin shells belt so that the two sets of peeling machine share a conveyor belt, the capacity of this machine: 3000KG/h.	
7	Belt picker	3000x400	2	\$2,400	\$4,800	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.55KW. 3.White food grade belt.	
8	Scraper Elevator	2000x400	2	\$2,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.55KW. 3. White nylon mesh plate, scraper height 50mm.	
9	Belt dryer (seven layers)	3200 × 3000	2	\$177,600	\$355,200	This machine adopts seven layers of continuous drying materials, two before and after the docking tandem; each line capacity: green walnut 5-6 tons / h, single machine length 32 m, conveyor belt on both sides of the chain width of 3 m, heat source: steam, power 87kw; drying cycle adjustment range: 30-40 hours; main air temperature adjustable range of room temperature - 70 ° C (adjustable); temperature of 30 ° C - 45 ° C (adjustable); touch screen + PLC Automatic control, material contact part and shell stainless steel material, Note: There is a downward installation pit on the ground, the demand side must be reserved before installation.	
10	Scraper Elevator	5000x400	1	\$4,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.55KW. 3. White nylon mesh plate, scraper height 50mm.	
11	Wind-blown de-emptying (deflated) shell machine (with unloader)	3800x600	1	\$13,600	\$13,600	This machine is equipped with vibration bin, fan power: 11KW, frequency conversion speed control, to achieve the effect of removing walnut empty shells, semi-empty shells, the use of Z-shaped nylon plate belt plus scraper lifting, all the debris to enter the waste collection hopper, the bottom of the legs have 4 rollers can be moved, drive motor: 0.55kw infinitely adjustable speed, see the detailed connection diagrams, the production capacity of the grading machine with the matching.	
12	Slag Conveyor	7000x600	1	\$4,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3.White food grade belt.	
13	Slag Conveyor	9000x600	1	\$5,000	\$5,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3.White food grade belt.	

add up the total	\$435,000
---------------------	-----------

B: Walnut shelling and taking kernel production line processing equipment							
14	Scraper Elevator	4000x400	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
15	Overhead Conveyor	4500x400	1	\$3,800	\$3,800	1. The whole machine plate SUS304 stainless steel manufacturing. 2.Power: 0.55KW.	
16	Guide Scraper Conveyor	700x400	1	\$2,000	\$2,000	1. The whole machine is made of SUS304 stainless steel. 2.Power: 0.37KW.	
17	Stainless steel silo	2400x2400	2	\$6,400	\$12,800	Both sides are equipped with vibrators to achieve uniform discharge without clogging, with photoelectric control: the bin is full automatically close the feed, the bin is empty automatically open the feed. Capacity: about 2 tons	
18	Scraper Elevator	2000x600	2	\$2,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
19	Adjustable Classifier	5000x1200	2	\$19,600	\$39,200	Both sides are equipped with vibrators to achieve uniform discharge without clogging, with photoelectric control: the bin is full automatically close the feed, the bin is empty automatically open the feed. Capacity: about 2 tons	
20	Scraper Elevator	6500x500	3	\$4,000	\$12,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
21	Stainless steel bin	2000x2000	3	\$5,600	\$16,800	Used for storing materials, the size of the bin outlet manually adjusts the switch to prevent the noise of impact when feeding materials, and there is a rubber mat underneath. Capacity: about 2 tons	
22	Widened shell press	1000x800	12	\$9,600	\$115,200	This product has light weight, small volume, easy transportation, simple operation, flexible use, high processing efficiency. The breakage rate of walnut shells of this equipment is less than 10%. This machine adopts 380V power electricity, power 0.75--3kW, energy saving and electricity saving. Hourly broken shell 300kg/h	
23	Scraper Elevator	10000x600	1	\$6,000	\$6,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
24	Vibrating Classifier	3000x1000	1	\$9,600	\$9,600	This machine is mainly used for sorting the size of walnut kernel, the panel open long waist hole, 500 long for the whole board. The vibration amplitude of this machine is adjustable by frequency conversion, and the frequency converter is Delta. The main material is 304 stainless steel, the thickness of the side plate is 2mm, the legs 50x50x3mm.	
25	Scraper Elevator	2500x500	1	\$2,400	\$2,400	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
26	Horizontal Disperser	3000x1200	1	\$37,600	\$37,600	This machine barrel center has a row of discs with guide plate, discs and discs between the gap interval distance is different, used to fall the head way and the second way; in the blue fruit shelling machine is not cracked or half-shell (with meat with shell) of the blue fruit through the machine rotating shelling way to break and not too much damage to the walnuts, kernel out of the head way rate is high.	
27	Scraper Elevator	2500x500	1	\$2,400	\$2,400	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
28	Scraper Elevator	5500x500	1	\$3,600	\$3,600	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
29	Negative pressure shell suction machine	2500x800	1	\$11,000	\$11,000	This machine mainly removes walnut kernels in the shell and broken kernel separation, the use of vibration principle will be broken after the shell of walnut kernels and shell crumbs separated from the average made of 304 stainless steel, fan power: 5.5kw, frequency control, vibration plate surface perforation of 3mm (the lower layer of crumbs), the shell below the mouth of the unloader.	
30	Scraper Elevator	2000x600	1	\$2,000	\$2,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
31	Scraper Elevator	3500x500	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
32	Negative pressure shell suction machine	2500x800	1	\$11,000	\$11,000	This machine mainly removes walnut kernels in the shell and broken kernel separation, the use of vibration principle will be broken after the shell of walnut kernels and shell crumbs separated from the average made of 304 stainless steel, fan power: 5.5kw, frequency control, vibration plate surface perforation of 3mm (the lower layer of crumbs), the shell below the mouth of the unloader.	
33	Scraper Elevator	3500x500	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
34	Infrared color sorter	LD2 (KP)	1	\$64,000	\$64,000	The models of color sorters are the latest models of color sorters, belonging to the special color sorters for pigant kernels, automatically removing walnut kernels that are not shelled cleanly.	
35	Scraper Elevator	3500x500	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
36	Vertical disperser	1000x1000	1	\$10,000	\$10,000	Walnuts with shells and meat after crushing and color sorting.	
37	Scraper Elevator	5000x600	1	\$4,000	\$4,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
38	Negative pressure shell suction machine	2500x800	1	\$11,000	\$11,000	This machine mainly removes walnut kernels in the shell and broken kernel separation, the use of vibration principle will be broken after the shell of walnut kernels and shell crumbs separated from the average made of 304 stainless steel, fan power: 5.5kw, frequency control, vibration plate surface perforation of 3mm (the lower layer of crumbs), the shell below the mouth of the unloader.	
39	Scraper Elevator	3000x500	1	\$2,400	\$2,400	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
40	Scraper Elevator	3500x500	1	\$3,200	\$3,200	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
41	Scraper Elevator	3000x800	1	\$2,400	\$2,400	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
42	Color Separator	LG2 (KP)	1	\$24,000	\$24,000	Color selecting moldy kernels from good walnut kernels.	
43	Scraper Elevator	2000x800	1	\$2,000	\$2,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
44	Multi-layer vibration screening machine	2500x1000	1	\$11,600	\$11,600	This machine is mainly used for sorting the size of walnut kernels, the use of vibration of the original Li will be walnut kernel sorting for the first two ways before the lower side of the material, three or four ways side of the material, crushed slag below the material, and no broken walnuts are also separated from the front of the upper part of the material; in order to prevent raw materials clogging the board holes, there is a silica gel ball vibration back to the top of the way of anti-blocking. The vibration amplitude of this machine is adjustable by frequency conversion, and the frequency converter is Delta. The main material is 304 stainless steel, the thickness of the side plate is 2mm, the legs are 50x50x3mm.	
45	Scraper Elevator	2500x500	1	\$2,000	\$2,000	1. The whole machine plate SUS304 stainless steel manufacturing. 2. Power: 0.75KW. 3. White nylon mesh plate, scraper height 50mm.	
46	10kg Walnut Kernel Vacuum Packing Line	CJD50K-D50	1	\$68,000	\$68,000	High resolution single point cantilever sensor with high sensitivity, bag clamping type weighing.... Adopt bag clamping mechanism, manual bag set, direct weighing, unloading bags. The equipment contains automatic weighing machine, large inclination elevator, coding machine, vibration conveyor, vertical external vacuum packaging machine, sealing conveyor,	
add up the total				\$508,800
